Professional Experience

Full Stack Developer

DataCell Solutions | Dubai, UAE | Jan 2023 – Present

On-site at Ministry of Health and Prevention (MOHAP)

- Designed and developed enterprise web applications that automated 90% of manual approval workflows, replacing paper-based and email-driven processes with structured, cross-department systems using ASP.NET Core Web API and React.
- Modernized a government strategy management system by migrating legacy AJAX components to React and design interactive KPI dashboards for strategic, operational, and project performance monitoring.
- Implemented drill-down analytics displaying targets, baselines, achieved values, KPI entries, and evidence uploads, improving performance visibility and reporting efficiency by approximately 70%.
- Developed a government CRM and analytics platform providing KPI-driven visibility into customer flow, service performance, and branch efficiency.
- Implemented service ticket tracking and SQL-based KPI calculations to analyze waiting times, service durations, and operational bottlenecks.
- Worked closely with the design team, transforming provided UI designs into fully functional, responsive front-end components

Software Engineer

Oasis Computer Systems | Jeddah, Saudi | June 2021 – Nov 2022

- Developed a web application that allows customers to request and compare motor insurance quotations (third-party and comprehensive) from 13 insurance companies.
- Implemented the full insurance purchase lifecycle, enabling customers to submit details, receive quotations, select suitable offers, complete online payments, and receive issued policies.
- Integrated online payments using Noon Payment to streamline checkout and insurance policy purchases.
- Developed a client-facing dashboard using Angular to monitor insurance quotations, issued policies, and system activity across aggregated insurance providers, improving transparency and operational visibility.
- Collaborated with backend teams to design and integrate APIs supporting core business processes, ensuring seamless data flow between frontend applications and backend services.
- Migrated a legacy application to a modern solution using ASP.NET Core, improving maintainability and scalability.

Web Developer

BHM & Partners | Saudi Arabia | Jan 2020 – Nov 2020

- Designed and developed responsive, SEO-optimized websites using HTML, CSS, JavaScript, Bootstrap, and Dotnet.
- Handled project lifecycle independently — from requirements to deployment.
- Delivered modern, user-friendly interfaces that boost client engagement.

Frontend Developer

Nubi-ICT | Khartoum, Sudan | Mar 2018 – Jan 2020

- Built dynamic web pages using HTML5, CSS3, and JavaScript.
- Improved performance and ensured mobile responsiveness.
- Translated Figma designs into clean, maintainable UI components and layouts.

- Collaborated with a cross-functional team to develop interactive dashboards and components.

Skills

- **Languages:** JavaScript (ES6+), TypeScript, C#.
- **Frontend:** React, Next.js, Redux, Bootstrap, HTML5, CSS3.
- **Backend & Architecture:** ASP.NET Web API, .NET Core, Microservices, RabbitMQ
- **Databases:** SQL Server, PostgreSQL, MongoDB
- **Version Control & Tools:** Git / GitHub

Projects

City Broker Insurance

Technologies: .NET core API, Angular

An all-in-one platform for comparing car insurance quotes from various providers. Users can submit their information, view detailed comparisons of different quotes, and seamlessly issue policies online.

[Expense Management](#)

Technologies: .NET Core, SQL Server, EF Core , Microsoft Identity, JWT Authentication

A system designed to record, categorize, and monitor expenses. It includes features such as adding transactions, viewing total expense summaries, filtering by category, and generating reports.
